

The Network of Medical Physics Departments of Hospitals for the Clinical Training

Thanks to the great support of the Italian and Croatian Medical physics community and the strong support to this ICTP and Trieste University initiative of the Italian Association of Medical Physics (AIFM), the Master has an extended network of Medical Physics Departments across Italy and Croatia.

In the second year of the programme, the students are addressed to one of the following hospitals of the network for a full-year full-time clinical training supervised by a senior clinical medical physicist.
